UVnetworks

UVexplorer® in 30 Seconds

WHAT DOES UVEXPLORER DO

UVexplorer delivers a Network Mapping solution that brings simple, automated Layer 2 maps to enterprise clients, enabling IT teams to visualize and document their network quickly and easily.

Window's-Based, Easy to Use Interface

Scheduled Automated Discovery

Archived Discoveries for Documentation Regulations

Term Subscription Licenses at Multiple Volume Stages

WHAT DOES THE UVEXPLORER NETWORK MAPPING SOLUTION INCLUDE

UVexplorer combines Layer 2 network mapping, switch/firewall/router configuration backup, inventory asset discovery and network troubleshooting features in a Windows-based solution and can be exported to PRTG and LucidChart.

Detailed Network Interface and Device Display

Configuration Script Backup & Comparison

Overlay Network Maps with PRTG Sensors

WHAT MAKES UVEXPLORER BETTER

UVexplorer fuses industry protocols such as SNMP v1-v2-v3, SSH, WMI and proprietary mechanisms to accurately capture network connections on Meraki, Ubiquity, Aruba, Juniper, MikroTik, Extreme and other network devices. The network discovery is enterprise quality that is effortless to integrate with enterprise technology stacks - delivering a significantly lower TCO.

Deliver Scripted Commands Network-Wide

VLAN Management & Topology

Troubleshoot Down Network Connections
